

maia

affordable solid surface worktops

Maia – the UK's leading solid surface worktop brand is now available from Carleton Furniture Group Limited.

The 100% acrylic surface of maia worktops gives a high performance, seamless finish that will withstand the everyday environments associated with residential accommodation facilities. Previously associated with high end kitchen and commercial applications – maia brings all the advantages of solid surface materials into the residential accommodation market and other contract sectors.

As a fully repairable product, maia's whole life cost is a significant consideration for maintenance managers within residential accommodation: any marks, minor damage or wear and tear can easily be removed by a simple maintenance regime. Why replace low cost worktops when maia can simply be brought back to its original as fitted finish?

The construction of maia means that blown worktops are a thing of the past, saving time, money, management hassle and increasing resident satisfaction

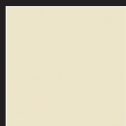

Think again. Think maia. Think Carleton.
